

PRODUCT FEATURES:

- ✔ **Address Validation for Correct Identification of Tax Jurisdiction:** Advanced matching process to verify and correct addresses. Includes a full street address verification, validation, correction, and lookup feature.
- ✔ **Sales and Use Tax Calculation:** Accurately calculate all taxes transparently in the background each time you create an invoice. Enables accurate tax calculation by selecting a product and invoicing it based on the receiving address.
- ✔ **Secure Data Storage for Tax Filing and Reporting:** Complete transaction history and detailed reports of every transaction. All communications between your systems and the AvaTax service use the strongest encryption available.

Comprehensive Sales Tax Processing :

A correct sales tax calculation starts with identification of all applicable taxing jurisdictions to a street address. For every calculation, Credit Card Advantage with the AvaTax option performs address verification, then locates the exact street address within a jurisdiction using a geocoding mapping system. The calculation is made, referring to pre-set user configurations including nexus, tax jurisdictional issues, exception processing, product taxability rules, sourcing rules, split rates, and maximum tax. All of this happens transparently in the background, automatically updating your accounting application.

Automated Reporting and Returns-Generation

Easily-accessible user interface and reporting platform provides detailed, summary, and exception reports to exceed statutory tax return requirements. Views and drill-downs encompass customer/invoice, product, reason for exemptions, jurisdictional information and a detailed breakout of rates and taxes by jurisdiction.

An incorporated returns platform provides sophisticated selection of required forms, pre-population of tax data for a specified filing period, and intelligent calculations within the form. A revision/approval process is included, permitting AvaTax to maintain records of adjustments.

Seamless Integration with Microsoft Dynamics

Credit Card Advantage with AvaTax sales tax calculation option is seamlessly integrated with Microsoft Dynamics-Great Plains offering:

- Enterprise-class capabilities at a price any business can afford
- Seamless integration with complete sales tax automation
- Little or no workflow impact

CREDIT CARD ADVANTAGE

Companies today need a system for accepting credit cards that is fast, secure, and reliable. Credit Card Advantage offers fast, accurate verification of electronic payments in a matter of seconds. With its streamlined, simplified model for handling sales tax, Credit Card Advantage with the AvaTax sales tax option offers businesses a much-needed service.

Within minutes, Credit Card Advantage with AvaTax integrates seamlessly with your accounting software to automate the sales tax compliance function for your business - speeding data entry time, improving accuracy and streamlining returns.
