CRM Charge

Real-time or Batch Mode Electronic Payment Processing for Microsoft Dynamics CRM

Microsoft Dynamics CRM offers familiar and flexible functionality that works within Microsoft Office environment. It has transformed the way many companies automate their business processes. CRM Charge is a critical piece to extend many sales related processes to be handled in Dynamics CRM, where payment is required as part of the transactions. CRM user can create sales document and choose to charge the transaction in real-time or save it in a batch for later processing.

Essential Payments Management

CRM Charge provides secure efficient electronic payment management for Microsoft Dynamics CRM. It allows users to process credit cards and enter electronic transactions directly from the CRM sales modules and have those payments verified without leaving the CRM environment. This increases the accessibility and visibility of order and payment information across company-wide departments so you can efficiently capture customer information, sales orders and satisfy customer demand.

Fast and Secure Credit Card Processing

Companies today need a system for accepting credit cards that is fast, secure, and reliable. With Nodus' CRM Charge you will experience faster approval times and automatic data transfer to your CRM system that increases productivity, reduce overhead, and streamline business operations allowing your company to achieve Rapid ROI. CRM Charge enhances the CRM ability to optimize customer satisfaction and improve the process efficiency of payment collection.

More Payment Functionality

CRM Charge gives you the power and flexibility to add more epayment functionality to your CRM applications. These include:

- Ability to process credit card and eCheck transactions for both Account & Contact in Microsoft Dynamics CRM
- Provides secured storage of multiple credit card numbers for each account in Microsoft Dynamics CRM
- Supports every type of sales documents : Quote, Order, Invoice
- Support multiple gateways and processors for competitive merchant account service rate
- Provides credit card transactions with reports, receipts, and specific transaction inquiry.

Achieve High Level of Customer Satisfaction

With detailed and complete customer information available to all departments, you can immediately retrieve and utilize reports to derive customer insights from detailed order and payment information. Supply all members of your organization with the information necessary to deliver consistent customer service and ensure a high level of customer satisfaction. Start verifying credit card information from Microsoft Dynamics CRM today.
