Electronic Payment Processing for Microsoft Dynamics® GP

Simplify Payment Acceptance | Fulfill PCI Requirements | Accelerate Growth

Credit Card Advantage (CCA) processes Credit Card, ACH/eCheck, Gift Card and Foreign Card payments within Microsoft Dynamics GP. Transactions are processed securely and seamlessly integrated. Through CCA, payment processing can be automated, which will reduce human errors, increase efficiencies and simplify the payment acceptance process. Return on investment is immediate.

Innovative Security Options

CCA is a PA-DSS certified solution and is available in three secure versions, including on-premise DSS, off-premise Tokenization or cloud-based PayFabric®. All three versions assist with PCI Compliance, offering a safe approach to online payment acceptance.

Accelerate Growth with Simple Extensibility

Enhance organizational infrastructure by integrating CCA with existing e-Commerce, Online Bill Pay and Web Sales Entry solutions. Support rapid growth and streamline operations with direct end-to-end process.

Minimize Risk and Liability with Paylink*

The optional Payment link feature minimizes your company's risk by letting your customers enter their own payment information and maintain full control of their sensitive financial details, without having to login.

Increase Savings by Reduced Processing Fees

Do you take credit cards from businesses and corporations? CCA supports level 2 and 3 transactions. Our Payment Acceptance team works with you to prevent downgrades, reduce transaction fees and save you money with purchase and corporate card transactions.

Reduce Cost & Boost Productivity

Faster approval times and automatic data transfer to your accounting solution will simplify business processes, increase productivity and reduce overhead.

* CCA PayFabric® required.

Features + Benefits

✓ Process electronic transactions in real-time within Dynamics GP

✓ Help protect your business with Fraud Prevention through AVS/Zip/CVC Validation

✓ Preview and print daily electronic transaction and activity reports

✓ Manage expired credit cards to avoid payment delays

✓ Use the customer inquiry tool to enhance accounts receivable service and access all processed transaction records

✓ Save credit card and/or eCheck transactions in a batch for automated mass/bulk processing

✓ Import transactions through 3rd party system and process against credit card/eChecks saved on file

✓ Manage payment information through Wallet Management

✓ Facilitate partial shipment and multiple authorizations against a sales document

✓ Support Level 2 & 3 data submission to reduce transaction fees

✓ Ease reconciliation complexity with auto-reconciliation for processed transactions

We have been PCI Compliant for many years by using Nodus Products. Over the last year, we converted 19 of our businesses from Nodus CCE to Nodus Tokenization. We also launched 15 ePay websites with embedded Paypal pages. These Nodus Products give our systems a complete, hands-off approach to PCI Compliance. We have a great partnership with Nodus and their support team worked with us every step of the way for a very successful project. The overall result of the project is a better customer experience and more efficient systems.

DIANE BENZ
Dominion Enterprises

Credit Card Advantage integrates seamlessly with Dynamics GP and allows us to easily monitor transactions and payment batches... Nodus made it easy!

SEAN FINNERAN
Sea Island Acquisition, LLC

Nodus made it possible for us to improve efficiency, slash our credit card processing fees and improve customer service with one easy-to use solution. Order entry, shipping and reconciliation are a breeze to manage. This gives us a strong advantage in the market.
