

Electronic Payment Processing for Microsoft Dynamics[®] CRM

Simplify Payment Acceptance | Shorten Order Cycles | Increase Customer Satisfaction

CRM Charge allows CRM users to instantly process electronic transactions directly from their CRM, including credit cards or ACH/echecks, and have those payments integrate with their ERP, in real-time.

Plug and Play

CRM Charge is a plug-and-play solution that can easily be customized to process payments against any custom or native CRM windows and entities. This seamless integration is orchestrated without any complex coding, thus eliminating the need for costly customizations.

Simple Out-of-the-Box Wallet Management

Easily create and maintain payment information for Accounts and Contacts. Manage customers' payment information such as credit cards securely within CRM through reports and dashboards.

Highest Level of Security

CRM Charge processes ePayments via Nodus' PCI-DSS certified PayFabric, guaranteeing the safest approach to online payments without having to worry about data breach costs and fines.

Integrated Payments

Take advantage of payment integration between Microsoft Dynamics CRM and GP out of the box or easily integrate CRM Charge payments to other ERPs, accounting programs or back-office applications.

Additional Features

- ✓ Associate sales documents with multiple authorizations
- ✓ Split document total into multiple credit cards and eCheck/ACH
- ✓ Save epayments in a batch for bulk processing
- ✓ Customize receipt templates with WYSIWYG editor
