

Electronic Payment Processing for Microsoft Dynamics[®] CRM and 365

Simplify Payment Acceptance | Shorten Order Cycles | Increase Customer Satisfaction

CRM Charge allows CRM users to instantly process electronic transactions directly from their CRM, including credit cards and ACH/echecks, and have those payments integrate with their ERP in real-time.

Plug and Play

CRM Charge is a plug and play solution that can be easily customized to process payments against any custom or native CRM windows and entities. This seamless integration is orchestrated without any complex coding, thus eliminating the need for costly customizations.

Simple Out of the Box Wallet Management

Easily create and maintain payment information for Accounts and Contacts. Manage customers' payment information, such as credit cards, securely within CRM through reports and dashboards.

Highest Level of Security

CRM Charge processes ePayments via Nodus' PCI-DSS certified PayFabric, guaranteeing the safest approach to online payments without having to worry about data breach costs and fines.

Integrated Payments

Take advantage of payment integration between Microsoft Dynamics 365 and GP out of the box or easily integrate CRM Charge payments to other ERPs, accounting programs, or back-office applications.

Additional Features

- ✓ Associate sales documents with multiple authorizations
- ✓ Divide document total between multiple credit cards and eCheck/ACH
- ✓ Save ePayments in a batch for bulk processing
- ✓ Customize receipt templates with WYSIWYG editor
