PayFabric®

Offering Payment Processing Solutions For Oracle

PROCESS PAYMENTS DIRECTLY FROM ORACLE USING PAYFABRIC VIA EVO ADAPTER

Payment Processing with PayFabric

PayFabric is a simple, flexible and secure payment processing platform that enables businesses of all sizes to accept electronic payments whether credit card or ACH. With PayFabric, merchants can reduce their PCI compliance scope, automate manual accounts receivables tasks, and save on credit card processing rates.

Oracle E-Business Suite Integration

PayFabric has been integrated directly with the Oracle E-Business Suite to provide users seamless payment processing directly inside of their Oracle application. As PayFabric has been integrated into Oracle Payments via EVO Adapter, it inherits the transaction processing for the following modules:

- iStore
- Order Management
- Receivables
- Collections
- iReceivables
- Service
- Service Contracts
- Order Capture
- Lease Management
- Partner Management
- Student System

Highest Levels of Data Security

PayFabric is PCI Level 1 compliant and stores sensitive payment data in the cloud to reduce security risk and ease PCI requirements.

Business Analytics

PayFabric's reporting provides access to view and manage the lifecycle of payment transactions, including information on the processing cost of every transaction and custom reports that identify on-going savings.
